

SAVE ENERGY.

SAVE MONEY.

EcoWatt : Smart Energy Monitoring System

Monitor.Analyze.Alert.Save.

THE PROBLEM

High Electricity consumption leads to higher bills, wasted resources, and negative impact on the environment

WHY DOES IT HAPPEN?

Lights left on when not in use

Appliances left unplug

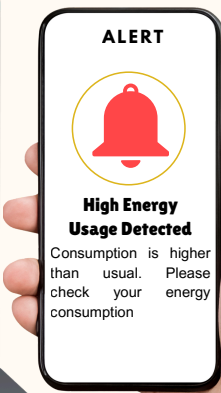

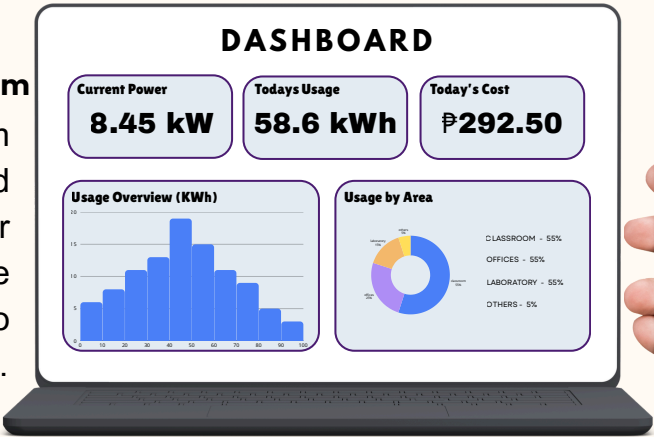

No real time monitoring of energy use

THE SOLUTION

EcoWatt

A Smart Energy Monitoring Sytem
a technology-enabled system that helps schools and organizations monitor electricity usage in real time and encourages everyone to make smarter energy choices.

HOW IT WORKS

SMART SENSOR

Measures electricity consumption

DIGITAL SYSTEM

Measures electricity consumption

DASHBOARD

Shows real-time usage and estimated cost

ALERT

Sends notification when consumption is unusually high

USER

Adjusts usage and saves energy

KEY FEATURES

Real-time Monitoring

High-Usage Alerts

Room/Device Tracking

Usage Reports (Daily/Weekly /Monthly)

Estimated Electricity Cost

Energy-Saving Recommendation

BENEFITS

FOR USERS (Students and Staff)

- Lower electricity bills
- Greater awareness
- Easier monitoring
- Encourage responsible energy use

FOR SCHOOL/ORGANIZATON

- Reduced operating costs
- Better resource management
- Data-driven decision making

FOR THE ENVIRONMENT

- Less energy waste
- Reduced carbon footprint
- Support sustainable practices

THE IMPACT

HIGH CONSUMPTION

LOW CONSUMPTION

Be the reason we use less today for a better tommorow
